EDUCATION

University   City, State

Degree   *Graduation Date: Date*

WORK EXPERIENCE

Accenture   Hyderabad, TS

Application Development Associate   *Sep 2021 - Dec 2022*

- Implemented a machine learning model to automate contract attribute extraction, reducing manual effort by 80% and enabling the successful migration of 500+ physical legacy contracts to a digital format.
- Developed a text clustering model with 95% accuracy, enhancing document management efficiency and achieving a 50% productivity increase in document categorization and retrieval.
- Developed and implemented a chatbot with Azure Cognitive Services, improving customer issue resolution efficiency by 40%.
- Conducted user testing and feedback sessions, achieving a 90% accuracy rate in understanding and responding to user queries within the first month.

Accenture   Hyderabad, TS

Application Development Analyst   *Dec 2022 - Present*

- Developed Model Hub with Python and Flask, providing users access to 20+ models without separate keys or documentation. Seamlessly integrated MongoDB for efficient model metadata storage and retrieval.
- Engaged in code reviews, sprint planning, and daily stand-ups to ensure project alignment and code quality maintenance.
- Deployed and managed the web app seamlessly using Azure services, including Azure Function for the backend and App Service for the frontend.

PROJECT EXPERIENCE

PDF Document QA   City, State

Title

- Developed a PDF query system using AzureOpenAI, and Flask framework, enabling dynamic queries based on inserted PDF content.
- Utilized Streamlit as the frontend to showcase the capabilities of the backend effectively.

Real Time Health Care Management System   City, State

Title

- Designed and implemented a Healthcare Management System using Flask and Python.
- Developed features for efficient patient record management, appointment scheduling, and prescription tracking.
- Implemented robust user authentication and role-based authorization, enhancing security and access control for doctors, patients, and administrators.
